CTI / FORECAST

TLP:CLEAR

PREDICTIVE THREAT INTELLIGENCE FOR SMBS AND MSSPS

See threats rising before they reach you.

THE PROBLEM

Security teams at SMBs and service providers have neither the time to read hundreds of reports a week nor the budget for the big intelligence platforms. Free feeds are noisy and lack context: they trigger alerts nobody can explain.

THE SOLUTION

CTI Forecast continuously reads 300+ research sources (vendors, CERTs, labs) and cross-checks them with curated feeds (ESET, abuse.ch). Every indicator is scored, enriched and linked to the article that cites it. A model estimates which vulnerabilities will be exploited within 30 days.

63%	17 days	0.81	257,000+
of CVEs added to the CISA KEV catalog were already tracked before being added	median lead time over CISA	forecast model AUC, versus 0.58 for EPSS alone	indicators published, 339 sources tracked

Measured on historical data, August to November 2026. Method and limitations: ctiforecast.com/en/performance

WHAT YOU GET

- **Sourced indicators**: IPs, domains, URLs, hashes, CVEs, each linked to its source
- **Explained confidence score** that decays over time (30-day half-life)
- **Enriched IPs**: ASN, operator, country; CDNs and major legitimate sites excluded
- **CVE exploitation forecast**, retrained weekly
- **Trends**: threats whose mentions are accelerating
- Public **weekly bulletin**

INTEGRATIONS

- Documented REST API (OpenAPI 3.1)
- TAXII 2.1 server: OpenCTI, Microsoft Sentinel, MISP
- STIX 2.1 export (TLP:GREEN)
- Blocklists: pfSense, OPNsense, Wazuh, Splunk

TRUST AND COMPLIANCE

- French publisher (Lyon), business customers only
- GDPR: DPA available, looked-up values never stored
- Two-factor authentication, encrypted backups in France
- Model performance published, limitations included

PRICING

Free	Pro	Business
€0	€49/month excl. VAT	€199/month excl. VAT
100 requests/day · CVE and SHA-256 · 24 h delay	10,000 requests/day · all types · real time · TAXII, STIX, sources	100,000 requests/day · bulk export (500,000 rows)

14-day Pro trial, no credit card. MSSPs and high volumes: custom quote.

Free trial and data sample, no sign-up needed
